

This reply comes with the caveat that I am a Labour candidate standing in the Senedd election and I will be bound by the Labour manifesto

These are my personal views

I am completely opposed to nuclear weapons

On the pension fund whilst it may be easy not to invest in the direct manufacture it becomes more difficult to not invest in sub-contractors and other parts of the supply chain so it is a yes in principle

On a personal level I support a Senedd policy of prohibiting the transporting, stationing or deploying nuclear weapons in Wales, in Welsh air space, and in Welsh coastal waters

I am opposed to nuclear power stations and the storing of nuclear waste in Wales

Regards

Mike Hedges
