E 2011 offered the world a ray of hope in the form of a disaster in a world in which the power hung in the balance. It was a chance for the world to rethink its priorities and to plan for the Earth's future. It was a moment of optimism and hope for the world.

When a massive tsunami ripped through Fukushima in 2011, nuclear fears followed for the region. Brian Jones of CND Gym, who has just returned from a fact-finding visit there, tells Kirstie McCrum that for those who remain, life will never be the same again.

The aftermath of the Fukushima tsunami in Tomioka

‘It was far worse than I could have imagined…’
